**METHOD OF DETERMINING RUBBING FRICTION
TORQUE IN A MOTOR VEHICLE POWERTRAIN**

REASONS FOR ALLOWANCE

The following is an Examiner's statement of reasons for allowance:

Claim 1 has been found to be allowable over the prior art because the prior art fails to teach or suggest a method of determining a rubbing friction torque for a motor vehicle powertrain comprising the steps of:

measuring and recording fuel cutoff deceleration values (DECEL) of said engine at a plurality of test temperatures of said engine including the base temperature; and

calculating a test rubbing friction torque at a given test temperature according to the equation as defined by the claim,

in combination with the remaining limitations of the claim.

Claims 2-6 have been found to be allowable over the prior art due to said claims' dependency on claim 1.

CONCLUSION

Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
